Please **AMEND** claims 4, 13, 19, 20 and 21 as follows:Technology Center 2100

1. A computer implemented method for detecting a need to update a prior registration of an on-line site provided on a network, said method comprising:

- (a) monitoring changes to the on-line site to determine a change value;
- (b) comparing the change value with a threshold value; and
- (c) determining the need to update the prior registration of the on-line site when the change value exceeds the threshold value.

2. A computer implemented method as recited in claim 1, wherein said monitoring (a) is periodically performed and comprises:

- (a1) accessing the on-line site over the network;
- (a2) examining files associated with the on-line site over the Internet to produce current site information; and
